

DPD-6877-59

9 October 1959

The Perkin-Elmer Corporation
Norwalk, Connecticut

ATTENTION:

Gentlemen:

As a result of the final property audit made under Contract No. SC-21-54 the Auditor recommended that you be requested to set-up additional property records which would facilitate determination of total property accountability. This recommendation did not apply to the Bonded Warehouse inventories on Contract No. SC-56-42.

In view of the Auditor's recommendation, you are requested to comply with the following:

a. The requirements of ASFR, Appendix B, concerning information to be provided by the Contractor's property control system.

b. Submission of certified residual inventories concurrently with final cost proposals.

As you are aware, our most recent contract will involve considerable GPP and Contractor acquired equipment for use at the new facility. You are urged therefore to establish and maintain records which will fully and completely reflect accountability of these items.

Very truly yours,

Contracting Officer
